Subject: RE: Palos Verdes Shelf: Upcoming PVSTIEG Meeting

Hi Denny:

The Focused Feasibility Study with updated Conceptual Site Model and Risk Assessment is tentatively scheduled to be finalized in 2024 (if no data collection is needed). You should see the draft FS late 2023.

The Second MNR Study is tentatively scheduled to be finalized in late 2023 (if the fish collection goes according to plan). You should see the draft summer 2023.

We will discuss the detail schedule for the FS and the tentative schedule for the Second MNR Report in the upcoming PVSTIEG meeting.

Ocean Disposal: Since PV Shelf Operable Unit only addresses contamination discharged through LACSD's White Point Outfall, ocean disposal as discussed in the October 2020 LA Times article is not considered a part of the PV Shelf operable unit. My supervisor John Chesnutt is the current EPA contact for this issue. As for status, I believe a multi-agency meeting (State and Federal) is being coordinated in the senior management level. I know my management have been working with the State Water Resources Control Board and the LA Regional Water Quality Control Board. I am not in the loop for those calls. If you have specific questions, please let me know. I can try to get you the answer.

Please let me know if you have any questions or need additional information.

Thank you.

Judy

Importance: High

Good Morning Judy, I have to brief our Director tomorrow morning and I just found out this morning. Can you give me your estimate for submittals of the 2nd Natural Recovery report and the Feasibility Study, please.

Also what is the status of the Deep Water disposal sites? Who is taking lead, etc..

Subject: Palos Verdes Shelf: Upcoming PVSTIEG Meeting

EXTERNAL:

Hi All:

Hope this email finds you well.
It has been quite a while since we last met as a group.
It is time for another PVSTIEG meeting.

Please use the Doodle link below to identify your availability for the weeks of April 26th and May 3rd.
https://doodle.com/poll/f5yb5m9ettdth29x?utm_source=poll&utm_medium=link

Please provide your response by COB, April 13th.

The purpose of this meeting is to provide you with an update on the process and timing of the Focused Feasibility Study, and to solicit your input on the upcoming Second Monitored Natural Recovery Report.

In addition, I think it will be good to have some discussion on the deep water ocean disposal site that was highlighted in the October 2020 LA Times article.

Since it has been a while since we last met, I would appreciate it if you can let me know if there are people in your organization that should be added to or deleted from the PVSTIEG mailing list.
In addition, please let me know if there are other technical experts that should be added to the PVSTIEG membership.

As usual, I will send out a draft agenda soon after we set a meeting date and the final agenda and presentation materials before the meeting date.

Thank you for your willingness to help EPA addressing the cleanup of Palos Verdes Shelf.

Judy
